

# Sustainable Events Professional (SEP) Workshop

Days: **2 Days** | Course Fee: **USD 1,800**

## Course Description

The Sustainable Events Professional (SEP) program is an advanced training curriculum designed to build deep capability in sustainable event design, climate-aligned operations, stakeholder engagement, ESG reporting, and compliance with global standards such as ISO 20121, ESG frameworks, and the UNFCCC Green Events Tool (GET).

Participants will learn to embed sustainability principles from concept to post-event reporting and will be equipped to lead low-impact, socially responsible, climate-aligned events across corporate, sports, cultural, hospitality, and community sectors.

## What You Will Learn

- Sustainability, CSR, sustainable development, SDGs and ESG fundamentals
- Applying SDGs to events
- Deep CSR concepts and social impact integration
- Climate change science and greenhouse gases
- Measuring GHG emissions for events
- Designing climate-responsible events
- Creating purpose-driven events
- Using the UNFCCC Green Events Tool (GET)
- Using EcoLeaf for environmental performance
- Offsetting and carbon neutrality concepts
- Waste management for events
- Power and energy management for events
- ISO 20121 and implementation of sustainable event management systems

## Who Should Attend?

- Event managers and coordinators
- Sustainability and ESG professionals
- Venue and facility managers
- Tourism and government event departments
- Corporate CSR and communications teams
- Event production companies and suppliers
- Marketing, branding, and sponsorship teams
- Students and professionals entering the events industry
